

Year 5 Autumn 2 Homework

Reading

Please ensure you are reading for at least 20 minutes each day.
Remember to record this on your reading bookmark

Try reading books, comics, newspapers like *First News* or other texts. Remember reading is part of everyday life - you could read out a recipe or instructions to a game!

If you read a book that you would like to recommend, you could complete a book review and share this with your class, year group or even the school. We will share some of these in our weekly focus.

Remember to bring in your reading bookmark every **Friday** for Mrs Jones and Miss Peckham to count up your reads to reward your Bronze, Silver and Gold reading awards.

Maths

By the end of Year 5 you should know all your times tables up to 12×12 , including their related division facts. Which are your tricky ones? Identify them and keep practising.

How quickly can you recall your times tables? Can you identify all of the multiples in both ascending and descending order?

Practise your times tables by logging onto TT Rockstars and help your class out against the other Year 5 class in the Rockstar battle each week!

Home learning project (Optional)

These activities can be done in any order; you could choose to do one or several. Bring your completed projects into school before the end of the half term so that they can be displayed and celebrated.

This half term our Science focus is Space.

We will be learning about the planets that make up our solar system and the various forces in action. To help support this learning you can create a home learning project that will be displayed and presented to the rest of the year group.

You can choose to research planets, or perhaps a significant scientist; Can you create a 3D solar system? Maybe create a presentation about the planets or space travel? Who was Neil Armstrong? Why is he significant? Or come up with your own related project of your choice.

We ask that projects be brought into school during the week beginning **Monday 2nd December**. Rewards will be given to all projects submitted.

We see homework as serving 2 main purposes:

Providing **opportunity** to learn new things and build on existing knowledge

Encouraging **responsibility** in children's own learning

We ask that parents support this ethos and encourage children to complete the tasks that are set, listening to them read and supporting them in learning their times

tables.

Due date: Monday 2nd December
