

Year 5 Spring 1 Homework

Home learning project (Optional)

These activities can be done in any order; you could choose to do one or several. Bring your completed projects into school before the end of the half term so that they can be displayed and celebrated.

This half term our Geography focus is coasts. We will be explore what a coast is and how they are formed.

To help support this learning you can create a home learning project that will be displayed and presented to the rest of the year group.

You can choose to research coastal erosion and create a power point presentation or get creative and make a model of a costal line. Don't forget to try and explain how it has happened.

If you can, go and explore Calshot or Lepe beach to investigate what defences have been put in place to slow down or reduce coastal erosion. Take photos and notes.

You can choose whatever you wish, using the knowledge organiser to assist you.

Reading

You should try to read for at least 20 minutes each day but expect you to read at least 5 times a week and record this on your reading bookmark

Try reading books, comics, newspapers like *First News* or other texts. Remember reading is part of everyday life - you could read out a recipe or instructions to a game!

If you read a book that you would like to recommend, you could complete a book review and share this with your class, year group or even the school. We will share some of these in our weekly focus.

Remember to bring in your reading log every **Friday** for Miss. Peckham and Mrs Jones to count up your reads to reward your Bronze, Silver and Gold reading awards.

Maths

By the end of Year 5 you should know all your times tables up to 12 x 12, including their related division facts.

How quickly can you recall these? Can you identify all of the multiples in both ascending and descending order?

Practise your times tables by logging onto TT Rockstars and help your class out against the other Year 5 class in the rockstar battle each week!

Due date: Friday 7th February

We see homework as serving 2 main purposes:

Providing **opportunity** to learn new things and build on existing knowledge

Encouraging **responsibility** in children's own learning

We ask that parents support this ethos and encourage children to complete the tasks that are set, listening to them read and supporting them in learning their times tables.
